

Chubb Personal Risk Services

Wealth at Risk: How High Net Worth Families Overpay to Be Underinsured

Survey Reveals Many Opportunities to Improve

Protection and Maximize Value in Families'

Personal Insurance Programs

INTRODUCTION

A MESSAGE FROM YOUR ASSUREX GLOBAL PARTNER:

As an affluent individual, you have proven yourself to be financially savvy—saving money when you can and investing wisely. But are you spending your hard-earned wealth wisely when it comes to insurance? We, as Assurex Global Partners, wanted to share the following white paper with you so you could see the breadth of ways in which high net worth individuals, like you, are overpaying to be underinsured.

In 2010 and 2012, Chubb Personal Risk Services® conducted a survey of more than 600 independent insurance brokers and asked if their clients were over or underinsured with their mass-carrier insurance for 21 types of coverage. The results were not supportive of mass-carrier coverage, to put it politely, showing less than diligent concern a nonpersonalized insurer can have for a client's financial security.

According to the survey, 63 percent of independent insurance agents were able to insure a new client properly and keep the annual premium at no more than 5 percent above the mass-carrier price. In half the cases, it was less.

An independent insurance agent considers your holistic lifestyle when recommending insurance coverage. Because of the multiple facets that comprise your lifestyle, there are more variables that a discerning agent can use to adjust coverage in order to keep you properly insured and not paying too much simply because you can afford it.

We hope after reading this white paper, you are able to determine if you are also overpaying to be underinsured, and what steps you can take to be more financially secure in the future.

EXECUTIVE SUMMARY

Independent insurance agents and brokers frequently find that families with substantial assets who insure their homes, autos, watercraft, and valuable collections with mass-market, heavily advertised carriers overpay for protection that still leaves them exposed to severe financial loss.

What are the specific risks, and why are these high net worth (HNW) families paying more than necessary? To find out, Chubb Personal Risk Services surveyed more than 600 independent insurance agents and brokers in 2010 and again in 2012 about their new HNW clients who were previously insured by a mass-market carrier. The survey asked if the clients were likely overinsuring or underinsuring for 21 types of coverage. It also asked about the likelihood of 11 types of savings opportunities being missed.

Reformatted and reprinted with permission from Chubb Personal Risk Services for the clients of Assurex Global Partners

A Widespread and Worsening Problem

The agents' answers reveal that the problem of overpaying to be underinsured has worsened overall. On average, significantly more agents in 2012 than in 2010 said each type of coverage was likely underinsured and each savings opportunity was likely missed.

Average Percent of Agents Saying:	2012	2010	Ppt. Chg.
Each coverage underinsured	58.3%	54.9%	+ 3.4
Each coverage overinsured	7.5%	7.8%	- 0.3
Each savings opportunity missed	27.7%	22.1%	+ 5.6

Top Areas of Overpaying

Having deductibles that were too low, failing to earn package discounts, and not getting premium credits for alarm systems and other loss prevention devices continued to top the list of missed savings opportunities. The likelihood of missing the last two increased significantly from 2010 to 2012.

Percentage of Agents Reporting Savings Opportunity Was Likely Missed	2012	2010	Ppt. Chg.
Deductibles too low	81%	78%	+ 3
Package discounts	62%	55%	+ 7
Loss prevention credits	50%	36%	+ 14

Top Areas of Underinsuring

Coverage for umbrella liability, valuable collections, uninsured/underinsured liability, and rebuilding a damaged home remained the most likely underinsured risks.

Percentage of Agents Reporting Client Was Likely Underinsured	2012	2010	Ppt. Chg.
Umbrella liability	92%	89%	+ 3
Valuable collections	86%	83%	+ 3
Un/underinsured liability	86%	82%	+ 4
Home structure	83%	86%	- 3

Fully 51 percent of agents reported that they were able to reduce HNW family's premiums by 5 percent or more by rebalancing their insurance program from the mass-market agency's ill-fit program.

Equal Chance of Being Over or Underinsured

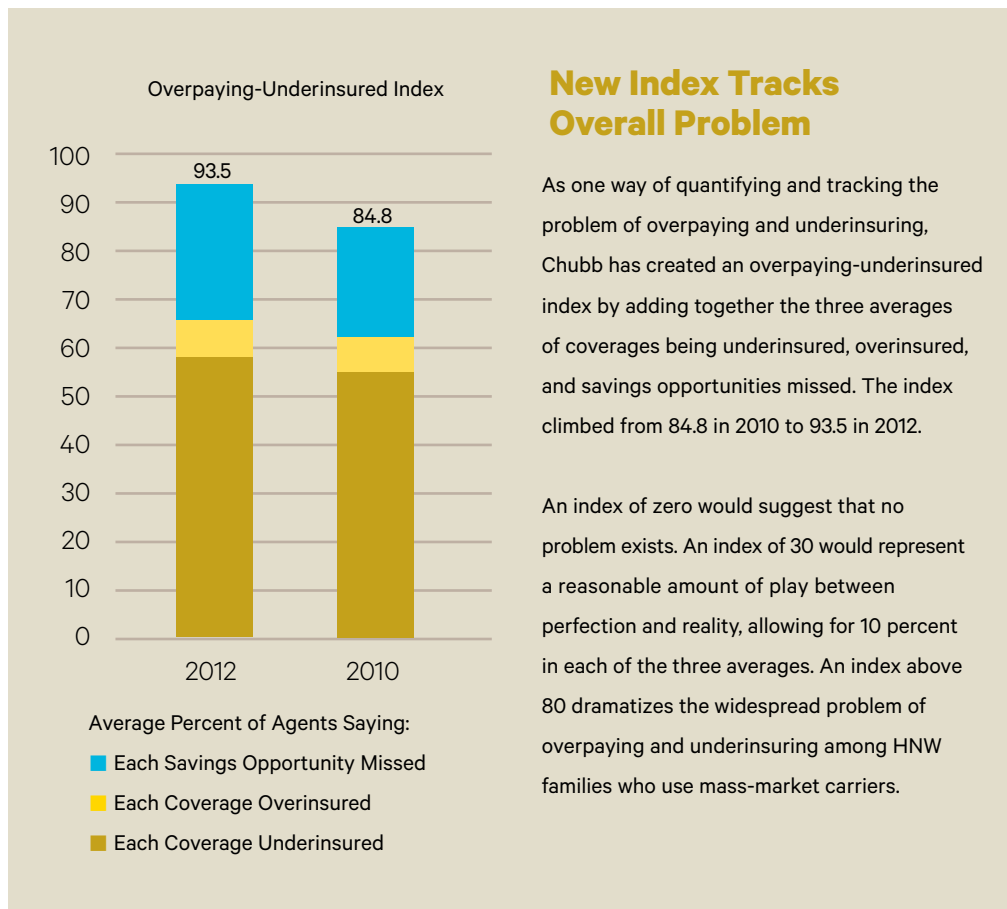

- As in 2010, about 30 to 40 percent of agents reported that clients likely had too much insurance for the other structures on their property (detached garages, swimming pools, fences, and so forth), minor losses (by carrying a deductible that was unnecessarily low), and the personal property in their home.
- But almost the same percentage of agents said these areas were likely underinsured.

Better Protection Need Not Cost More

Because HNW families overlook many savings opportunities, most agents say they can typically rebalance their personal insurance program to achieve more effective protection without significantly increasing premiums.

- Fully 51 percent said they typically reduce premiums by 5 percent or more when they place new clients with a carrier that specializes in serving HNW families (HNW-market carrier) and then rebalance the insurance program.
- Another 12 percent of agents say they typically keep costs within plus or minus 5 percent.

The rebalancing involves a thorough review of the client's assets and lifestyle to identify risks as well as an assessment of tolerance for those risks. The agent must also have access to a HNW-market carrier—a carrier that: 1) specializes in serving the needs of HNW families and 2) has the flexibility and breadth of coverages to make a customized approach possible.

A RENEWED FOCUS ON PROPER PROTECTION

Families with substantial assets overpay to be underinsured primarily because they fail to adjust their personal insurance program as they build wealth. Faced with the complexity of insurance policy contracts and often reluctant to think about bad things that could happen, these families leave their insurance relatively unchanged year after year.

But events of the last few years have brought new urgency to the focus on proper protection. In 2011, the Federal Emergency Management Administration (FEMA) declared 99 federal disasters, up from the record of 81 in 2010 and well above the average of 35 federal disasters per year since 1953.² In 2011, disasters included Hurricane Irene, heavy flooding in the Midwest, the most damaging wildfire in the history of Texas, a magnitude 5.8 earthquake that cracked the Washington Monument, the deadliest tornado since 1947, and a 'super derecho'—a line of intense thunderstorms that cut a 700-mile swath of destruction from the Midwest to the mid-Atlantic. In 2012, Superstorm Sandy in the Northeast and the Waldo Canyon and High Park fires in Colorado continued to draw attention to the vulnerability of family and home.

While such events impose hardship on both rich and poor, the tendency of wealthy families to have second homes near the beach or in scenic mountain areas makes them especially vulnerable. Many have learned through costly experience about limitations in their insurance policies regarding the cost of replacing their home, the coverage for valuable collections, and the cause of loss, such as sewer and drain backup, earthquake, and flood.

In addition to natural disasters, man-made events have raised the need for proper protection. High levels of financial market volatility have encouraged many high net worth families to step up spending on jewelry, fine art, wine, classic cars and other valuable collections as a means of asset diversification. While this strategy may or may not diminish their vulnerability to market risk, it does expose their asset base to greater levels of physical risk from theft, fire, and other perils.

Finally, considering the weak recovery from the 2008-2009 Great Recession, families with substantial assets have grown more concerned about the general attitude in society towards those at the upper end of the income scale. In a 2011 Chubb survey about liability risk among households with \$5 million or more in investable assets, 68 percent of respondents felt attitudes toward the wealthy had grown more negative.³ This concern extended to a heightened fear of being hit with a high-stakes liability lawsuit, as opportunistic plaintiffs seek to capitalize on defendants with deep pockets.

With these risks in mind, HNW families and their wealth advisors have a strong reason to look more closely at their personal insurance programs. According to the agents surveyed by Chubb, many will be even more likely than they were in 2010 to find significant savings opportunities that can partially or completely offset the cost of stronger protection overall.

In Colorado, 64 percent of homeowners affected by the 2010 Fourmile Canyon Wildfire were underinsured by an average of \$200,000, according to a survey by United Policyholders, a consumer advocacy group.¹

SAVINGS OPPORTUNITIES

Compared to 2010, more agents in 2012 reported that families insured by mass-market carriers were likely missing a variety of savings opportunities. The survey asked about 11 savings opportunities, and the average percent of agents reporting each savings opportunity as likely missed in 2012 was nearly 28 percent, an almost 6-point increase. Responses by savings opportunity ranged widely — from 81 percent for having a deductible that was needlessly low to 9 percent for missing an accident-free credit in their auto insurance.

Percent of Agents Reporting Savings Opportunity As Likely Overlooked			
	2012	2010	Ppt. Chg.
Deductibles too low	81%	78%	+ 3
Package discounts	62%	55%	+ 7
Loss prevention credits — home, car alarms, etc.	50%	36%	+ 14
Paying low collector car rates for a collector car	31%	19%	+ 12
New or rehabilitated home credit	22%	13%	+ 9
Storing infrequently worn jewelry in a bank vault	20%	16%	+ 4
Good student discount	11%	5%	+ 6
Credit rating (can it easily be lowered?)	10%	5%	+ 5
Accident-free credit	9%	10%	- 1
Accident prevention course credit	9%	6%	+ 3
Other	3%	3%	0
Average (excludes “other”)	27.7%	22.1%	+ 5.6

Families should consider how much they could pay for a loss without significantly affecting their lifestyle, and then ask their agent to estimate the premium savings they could achieve with a range of deductibles up to their maximum amount.

To help families and their advisors understand the dynamics and potential of the most commonly missed savings opportunities, this white paper offers the following explanations:

Increasing Deductible Amounts

81 Percent Said Likely Overlooked Savings Opportunity

Many HNW families insured by mass-market carriers have homeowners and auto insurance policies with deductibles of \$250, \$500, or \$1,000. Ironically, they pay a substantial amount in premium for these low deductibles, but they don't file a claim after a minor accident. They worry their insurance rates will go up, and they can easily afford to pay for repairs entirely out of their own pocket.

Instead, these families should consider how much they could pay for a loss without significantly affecting their lifestyle, and then ask their agent to estimate the premium savings they could achieve with a range of deductibles up to their maximum amount. This process allows them to assess the trade-off between risk and savings. Some of the wealthiest clients insured by Chubb select deductibles of \$1 million or more.

The savings can be substantial. Using the Chubb Platinum Portfolio policy as an example, the annual savings in premium for insuring a \$1 million home with a \$2,500 deductible versus a \$500 deductible could be about \$900. So, the homeowner must weigh the risk of paying an additional \$2,000 for a loss (\$2500 minus \$500) against the certainty of

saving \$900 per year in premium. Since Chubb's typical client files a claim for a home only once every 21 years, taking the higher deductible would be the better choice. The total premium savings would come to \$18,900 over 21 years, far outweighing the additional \$2,000 paid at the time of the one loss. As the table below shows, the homeowner would come out ahead even if a loss occurred in the third year. The savings can be even greater for a higher value home and a higher deductible.

EXAMPLE OF POTENTIAL SAVINGS WITH A HIGH DEDUCTIBLE					
\$1 Million Home: \$2,500 Versus \$500 Deductible					
Year #	1	3	5	10	21
Cumulative Premium Savings	\$900	\$2,700	\$4,500	\$9,000	\$18,900
Additional Deductible					
Paid If Loss Occurs	\$2,000	\$2,000	\$2,000	\$2,000	\$2,000
Net Cost/Savings	-\$1,100	\$700	\$2,500	\$7,000	\$16,900
\$3 Million Home: \$10,000 Versus \$5,000 Deductible					
Cumulative Premium Savings	\$1,800	\$5,400	\$9,000	\$18,000	\$37,800
Additional Deductible Paid					
If Loss Occurs	\$5,000	\$5,000	\$5,000	\$5,000	\$5,000
Net Cost/Savings	-\$3,200	\$400	\$4,000	\$13,000	\$32,800

Chubb makes the decision even easier with the Deductible Reserve. When a client chooses a homeowners deductible of \$2,500 or more, Chubb sets aside 10 percent of the deductible amount in a reserve for each claim-free year on the policy. When the client has his or her first claim, Chubb applies the reserve against the deductible amount to effectively reduce the out-of-pocket expense. For instance, after five claim-free years with a \$2,500 deductible, the reserve would equal \$1,250. If the client has a claim in the sixth year, the reserve reduces the deductible payment by half. The same logic holds if the client chooses a deductible of \$1,000 or more on his or her auto policy.

Package Discounts

62 Percent Said Likely Overlooked

Enticed by promises of savings from heavily advertised auto insurance carriers, even high net worth families can find themselves tempted to place their auto insurance with one company and their homeowners insurance with another. But the apparent savings can be illusory. Spreading the policies across different carriers not only increases the potential for gaps in coverage, it can diminish or negate the package discounts achieved when multiple policies are placed with one carrier. These discounts can be 10 percent or higher.

To maximize the benefits of package discounts, families should choose a carrier that can handle a wide range of needs so that the discount applies across the most insurance policies possible. For instance, Chubb Personal Risk Services allows the package discount to apply across home, auto, valuables, umbrella liability, and watercraft policies. Additionally, the policies often can be written as part of one package with common term dates and one consolidated bill, saving the client time as well as money.

Increasing the deductible on a \$3 million home from \$5,000 to \$10,000 could save \$1,800 per year.

Home, Auto
Valuables, Umbrella
Watercraft
Discounts can be
10 percent or higher.

Loss Prevention Credits

50 Percent Said Likely Overlooked

Agents reported that many families with fine homes, valuable collections, and luxury vehicles fail to take advantage of credits for safety systems such as burglar alarms, water leak detection, and power backup systems. When combined, the credits for various loss prevention systems can reduce homeowner premium by 30 percent or more. For automobiles, safety systems could reduce the comprehensive premium from 5 to 20 percent.

Systems that Often Earn Loss Prevention Credits	
Home Systems	Automobile Systems
Burglar alarms	Theft alarms
Fire alarms and sprinkler systems	Fuel cut-off switches
Electrical backup, lightning protection	Hood locks
Temperature monitoring	Steering locks
Water leak detection with auto valve cut-off	Ignition cut-off switches
Gas leak detection	Location transponders

In older homes, rehabilitating the plumbing, electrical, or heating system also helps prevent losses and lower premiums. Each rehabilitated system can earn a premium credit of up to 5 percent, depending on how recently the work was completed.

Finally, installing safety systems reinforces the choice of higher deductibles. When used together, the two strategies can reduce homeowner premium by up to half. Insurance companies such as Chubb that cater to HNW families offer such deep discounts for a number of reasons. Families who invest in safety systems and assume more risk for small losses through a higher deductible are more likely to be careful. Consequently, they usually suffer fewer losses, both large and small. It's a win-win outcome for both the client and the company.

Automatic standby generator

The combined credits for various loss prevention systems can reduce homeowner premiums by 30 percent or more.

One water leak caused \$130,000 of damage in 30 minutes.

The Real Savings in Loss Prevention: Avoiding Costly Damage

While premium credits reward the installation of loss prevention devices, the real benefit is avoiding costly, disruptive repairs and potential harm to your family.

Consider the Leak Defense System, a device that automatically detects leaks and then shuts off the water supply to minimize damage. It typically costs \$2,500 to buy and install and earns a 5 to 7 percent credit on Chubb's base homeowner premium. If it helps prevent major damage from just one leak, it pays for itself many times over.

GUARDING AGAINST SIGNIFICANT LOSS

More agents in 2012 reported that HNW families insured by mass-market carriers were likely underinsured for a wide variety of risks, many of them serious. The survey asked about 21 types of insurance coverage, and the average percent of agents reporting each as likely underinsured was 58.3 percent, up from 54.9 percent in 2010. The 3.4 percentage point increase just meets the threshold for being a statistically significant change.

The most commonly underinsured risks — umbrella liability, uninsured/underinsured liability, valuable collections loss, and home structure damage — remained relatively unchanged from 2010 to 2012, indicating little progress has been made in reducing key dangers to these families. Of the top risks, uninsured/underinsured liability increased significantly, perhaps because the weak economy has drawn more attention to the number of people who drive without paying for insurance. Many of the less commonly underinsured risks also saw significant increases. These include earthquake, off-road vehicle liability, and watercraft.

“A client with us for a few months lost the chiller for his vacation home wine cellar. A \$350,000 wine collection was ruined. Our HNW worth program insured him fully. His previous program with a mass-market carrier would not have covered him at all.”

*Donald Batchelor, VP,
Member of the LLC,
Lipscomb and Pitts Insurance, LLC*

Percent of Agents Reporting Insurance Coverage as Likely Underinsured			
	2012	2010	Ppt. Chg.
Umbrella liability	92%	89%	+ 3
Valuables	86%	83%	+ 3
Uninsured/underinsured liability	86%	82%	+ 4
Home structure (Coverage A dwelling limit)	83%	86%	- 3
Flood	75%	73%	+ 2
Mold	73%	72%	+ 1
Employment practices liability for domestic staff	72%	70%	+ 2
Auto liability	65%	66%	- 1
Not-for-profit director's & officer's (D&O) liability	65%	64%	+ 1
Earthquake	64%	56%	+ 8
Property association or club loss assessment exposures	62%	63%	- 1
Worker's compensation	61%	57%	+ 4
Loss of use of home (Coverage D limit)	57%	54%	+ 3
Incidental business activity exposures	54%	51%	+ 3
Off-road recreational vehicle liability	52%	45%	+ 7
Watercraft	40%	31%	+ 9
Personal property (Coverage C limit)	34%	30%	+ 4
Other structures (Coverage B limit)	33%	29%	+ 4
Deductibles too high (underinsured)	31%	22%	+ 9
Auto collision	20%	15%	+ 5
Auto comprehensive	20%	15%	+ 5
Average	58.3%	54.9%	+ 3.4

In addition to asking if a specific risk were likely underinsured, Chubb's survey also asked agents and brokers which risk was the most likely underinsured and which underinsured risk represented the most serious threat, or exposure, in industry terms. For each question, umbrella liability coverage and coverage for the home structure traded places as the top contender. Other types of liability coverage — such as uninsured/underinsured liability, worker's compensation, and employment practices liability — also figured prominently when lumped together.

“Quite often, those who are financially successful do not recognize how important it is to protect their assets from personal lawsuits filed by third parties. Securing broad coverage for a wide range of tort losses is critically important.”

*Ray Celedinas, President & CEO
Celedinas Insurance Group*

To help families and their advisors understand the dynamics and dangers of the most common areas of underinsurance, this white paper offers the following explanations:

Umbrella Liability

92 Percent Said Likely Underinsured

In today's economic and social climate, wealthy families increasingly fear that they will become the target of a high stakes personal liability lawsuit. According to an Chubb survey about liability risk among households with \$5 million or more in investable assets, 38 percent felt they were more likely to be sued in the aftermath of the economic and financial crisis, while only 7 percent felt they were less likely to be sued.³ Furthermore, 82 percent of the respondents believed their wealth alone made them an attractive target for a liability lawsuit.

Their fears are well founded. In many states, someone who is 1 percent responsible for an accident can be held liable for 100 percent of the damages to the injured parties under the laws of joint and several liability. Consequently, plaintiff lawyers often look to sue the party most able to pay instead of the party most at fault.

Moreover, jury awards and settlements can greatly exceed what wealthy families imagine as the worst case scenario. In the Chubb liability risk survey, half thought that the highest amount of damages they could be held liable for in an accident involving serious injury was less than \$5 million. The truth: jury awards and settlements can reach into the tens of millions of dollars. In 2008, \$29 million was awarded to the family of a four-year-old boy who suffered a debilitating spinal cord injury while riding as a passenger in a vehicle involved in a head-on collision. In 2012, a wealthy Floridian was convicted of manslaughter due to an auto accident and settled a related civil case for \$46 million.

Despite these high profile cases, 40 percent of wealthy households have less than \$5 million in umbrella liability coverage, including 21 percent who have none at all. Umbrella coverage is a critical component of an overall personal insurance program because the liability coverage in home and auto policies rarely exceeds \$500,000. When those limits of coverage are insufficient, umbrella coverage kicks in to provide additional protection. Without the additional protection, families can be forced to sacrifice their homes, their savings and investments, and their future income stream to pay damages. These dire consequences explain why agents ranked umbrella liability as the most serious problem of underinsurance. Fully 40 percent of agents gave it the top spot, more than for any other type of coverage. How much umbrella liability coverage should someone purchase? The most prudent choice is to match the combination of your net worth and future income stream. Carriers that specialize in serving high net worth families typically offer up to \$100 million in coverage. Their policies also pay for legal defense costs without using up the liability limit and cover the cost of having a public relations firm protect the client's reputation. Surprisingly, the cost per million dollars in coverage can amount to only a few hundred dollars. Thus, the savings in taking a higher deductible and bearing more responsibility at the low end of risk can more than pay for protection at the high end of risk—the kind of risk that can devastate a family's financial well-being and lifestyle. Besides encouraging clients to purchase the right amount of umbrella coverage, agents cited two additional mistakes to avoid:

- The umbrella liability coverage should start when the home and auto liability coverage limits end. For instance, if the home and auto policies provide up to \$300,000 in liability coverage, the umbrella policy should start at \$300,000. If it starts at a higher amount, say \$500,000, the client could become responsible for paying the \$200,000 gap.
- Recreational vehicles and company cars should be listed on the umbrella policy. In the case of company cars, the company-purchased auto insurance may prove inadequate, especially when the car is being driven for pleasure.

Underinsured/Underinsured Liability

86 Percent Said Likely Underinsured

One in seven drivers has no insurance, according to the latest nationwide statistic from the Insurance Research Council⁴. In some states, the ratio can be one in four. Due to the difficult economy, many more may have only the state-required minimum level of liability insurance, which can be as low as \$20,000 or even \$10,000.

If one of these uninsured or underinsured drivers causes an accident that results in serious injury, the injured person would stand little chance of recovering expenses for medical care that could run into the millions of dollars. The other driver would probably have insufficient assets to pursue in a lawsuit.

No-fault auto insurance laws could help in the few states that have them. Health insurance could also help, but lifetime payout limits and co-pay percentages could still impose a significant financial burden. Also, health insurance does not compensate for lost income and pain and suffering.

How much umbrella liability coverage should someone purchase? The most prudent choice is to match the combination of your net worth and future income stream.

“A client's daughter's friend took a four-wheeler off premises and was injured. The client was sued for a six figure amount and had no coverage for the incident with his mass-market carrier.”

*Donald Batchelor, VP,
Member of the LLC,
Lipscomb and Pitts Insurance, LLC*

The danger from the uninsured and underinsured goes beyond auto accidents. Consider a child flying off a neighbor's trampoline and suffering a permanent brain injury requiring life-long care. The expenses for medical treatment and care could amount to millions of dollars. But most homeowners have no more than \$300,000 to \$500,000 in liability coverage.

To address this risk, families can purchase additional uninsured/underinsured liability coverage as part of an umbrella policy from a HNW-market carrier. Coverage typically starts at \$1 million for as little as \$100 in annual premium, with options up to \$10 million. The family should check that the coverage is not limited to vehicular accidents. This coverage can also help when traveling abroad because it extends worldwide. The uninsured/underinsured motorist coverage contained in an auto policy usually stops outside of the U.S., its territories and possessions, Puerto Rico and Canada.

Other Key Liability Concerns

Personal liability tends to be one of the most misunderstood and neglected categories of insurance. In addition to umbrella liability and uninsured/underinsured liability, two additional types of liability coverage bear mentioning:

■ Employment Practices Liability for Domestic Staff

72 Percent Said Likely Underinsured

The standard liability coverage in a homeowners or umbrella insurance policy does not cover lawsuits brought by domestic employees for wrongful employment practices. These practices include discrimination, sexual harassment, wrongful termination, and other claims. In many cases, disgruntled nannies or housekeepers file baseless suits, hoping the family will settle to avoid onerous legal expenses and possible damage to their reputation and career. Adequate protection requires employment practices liability coverage, which may be available as a separate policy or as an optional endorsement to an umbrella policy. This coverage will pay for damage awards and legal fees to defend against even groundless suits.

■ Not-for-Profit Directors & Officers Liability

65 Percent Say Likely Underinsured

Many high net worth individuals volunteer as board members of charitable organizations. While commendable, this behavior creates liability risk. Volunteer board members can be held liable for the actions or inactions of the charitable organization. The most common suits involve wrongful employment practices, such as discrimination, wrongful termination and sexual harassment. The organization may carry insurance to protect board members, but a limited budget typically prevents the purchase of a heavy duty insurance program. Furthermore, these types of suits are not covered by a basic personal umbrella liability policy. To guard against this threat, volunteer board members should consider not-for-profit directors & officers insurance. This coverage is typically sold as an optional endorsement to an umbrella policy and might cost about \$500 for \$1 million in coverage.

During a party at a hillside home, many guests were injured when the overcrowded deck collapsed. The medical costs quickly exceeded the host's liability coverage.

Valuable Collections

86 Percent Said Likely Underinsured

Families with substantial assets often hold a significant portion of their total wealth in jewelry, art, wine and other valuable collections. In an Chubb study about collections among households with at least \$5 million in investable assets, 94 percent claimed to be collectors.⁵ Of those, 69 percent had collections worth \$500,000 or more, including 21 percent with collections worth more than \$5 million. Furthermore, 55 percent planned to increase their spending on their collections over the next 12 months. According to a 2012 Barclays report, high net worth individuals in the U.S. hold an average of 9 percent of their wealth in collectibles.⁶

While collectors may go to great lengths to acquire the items they desire, they frequently fail to adequately protect them. Fully 86 percent of agents said the families probably had their collections inadequately insured. The lapse stems mainly from three factors:

- **Crude tracking and valuation:** Insuring a collection properly starts with knowing what you have and how much it would cost to replace. Too often, collectors fail this task. Many use simple spreadsheets that cannot easily capture and organize supporting documents such as photos, bills of sale, and formal appraisals. They may also fail to track the current market value of their collections. In the Chubb collections study, one in three was not updating the market value of his or her collection every three years. That is not often enough, considering the significant shifts that have been occurring in the market value of gold, silver, art and other types of collectible items.
- **Homeowners insurance limitations:** Collectors may not realize that homeowners policies restrict coverage for jewelry, silverware, furs, stamp and coin collections, and breakage of fragile items such as marble statues, musical instruments, and bottles of fine wine. In standard policies, the coverage limits may equal only \$1,000 or \$2,000. Policies from HNW-market carriers contain higher limits, but they exist nonetheless.
- **Poor loss prevention:** Many collectors display or store their precious possessions in ways that increase the risk of damage or theft. For instance, they hang artwork above an active fireplace, where the hot, dry air and soot accelerates deterioration. Or, they store a valuable stamp collection in a closet beneath a bathroom. If the tub overflows or the toilet develops a leak, the stamps could be ruined. A professional risk consultant can help collectors avoid these mistakes, but 40 percent of collectors do not take advantage of this service, according to the Chubb collections study.

Benefits of a Valuables Policy

To gain the best protection, families should seek the added protection of a valuables policy for their collections. Often known as scheduling an item or adding a homeowners policy rider, a valuables policy allows the collector to declare the value of each piece, or group of pieces, on the policy. This valuation is not restricted by the limits in the homeowner policy, and the coverage applies to all types of perils, including those excluded by homeowners policies such as flood. Also, no deductible applies. Policies from HNW-market carriers have additional advantages. They provide a buffer against temporary fluctuations in the replacement cost of valuables articles by paying market value up to 50 percent higher than the scheduled amount of coverage in case of loss. Standard policies do not. In fact, some may pay even less than the scheduled amount if an actual cash value clause is in effect.

“A prospective client shared she had just lost a diamond stud only to learn it was not insured for mysterious disappearance. As we talked, I learned that she had a jewelry collection valued in the hundreds of thousands, but only had \$1,000 in very limited coverage to insure it. I helped her examine collections coverage that would cover the cost to replace the entire collection due to mysterious disappearance and many other risks. While we were at it, we added coverage for her uninsured collection of fine wine as well.”

*Kimberly A. Lucarelli,
Director of Sales, Sr. Vice President
Personal Client Management
Oswald Companies*

“I meet with a number of individuals who have secured coverage for their collectibles, yet are surprised to learn that many carriers determine the amount they are willing to pay after the loss has occurred. Just because you have insured an item for a certain amount, does not mean that carrier is obligated to match that value. I advise my clients to always insure their collectibles with one of a select group of carriers that pays at least the scheduled amount or even more if the market value of the item was higher just prior to the loss.”

*Betsy Clement
Producer
Gillis, Ellis & Baker*

Also, standard policies will often not pay for losses due to breaks or fractures of fragile items if, for instance, a precious statue or vase is accidentally knocked over. Such losses are typically covered by policies from HNW-market carriers.

These carriers also provide the ability to cover groups of items, such as a wine or art collection, on a blanket basis in which an overall coverage amount is set for the group. This approach eliminates the tedium of trying to estimate the value of each individual item, and makes the overall policy easier to manage.

Differences exist beyond coverage. HNW-market carriers will often bring in experts to suggest safety measures, such as a backup generator to keep a temperature-controlled wine cellar operating during a sustained power outage. They may also be able to assist in the evacuation of precious items from homes caught in the path of a hurricane.

Home Structure

83 Percent Said Likely Underinsured

The main home and any vacation homes often represent a significant, if not the largest, component of a family's net worth. Therefore, having the proper coverage in the homeowners policy is critical to a wealth protection plan.

Nevertheless, after almost every natural disaster, news stories describe families who have discovered they lack sufficient insurance to rebuild their home. According to a study conducted by United Policyholders one year after the 2010 Fourmile Canyon Wildfire in Colorado, 64 percent of respondents who lost their homes reported being underinsured by an average of \$200,000. In a similar study by the organization two years after a series of 2007 California wildfires, 66 percent reported being underinsured by an average of more than \$319,000.⁷

These disturbing numbers parallel the findings of MSB, a leading worldwide provider of building cost data and estimating technology for the property insurance industry. Its 2012 study estimated that 61 percent of American homes are undervalued for the purpose of insurance.⁸

For owners of custom-built or historic homes, the problem may be worse, especially if they insure their home with a mass-market policy. Standard industry tools that estimate the cost of rebuilding a home can undervalue the higher quality materials, superior craftsmanship, and unique architectural features in these types of homes. Furthermore, the owners may have expanded the size of the home or built a lavish entertainment center in the basement. Like most people, they forget to tell their insurance agent.

These homeowners should secure full replacement cost coverage (also called guaranteed replacement cost coverage) for the home structure. Available in all but a few states, this coverage will usually pay to rebuild the home with similar quality materials and craftsmanship, even if the cost exceeds the coverage limit in the insurance policy. In effect, this coverage shifts the responsibility for properly estimating the cost of replacing the home from the family and insurance agent to the insurance company. Therefore, the

“Sadly, I meet people each year who have sustained significant damage to their home, only to learn the cost to repair the damage is greater than what their mid-market carrier is obligated to pay. As a risk advisor, I direct my clients to the few carriers who inspect the homes they insure, adjust coverage to provide the full cost to rebuild, and then rebuild no matter the cost.”

*Ronald R. Assise,
President / Personal Insurance
The Horton Group*

“Our client’s home experienced damage from a windstorm that affected many others in the area. While the HNW carrier he was insured with authorized the use of building materials that were of like kind and quality, many of his neighbors discovered their mid-market carriers only paid for repairs using materials of “similar quality.” We gained quite a few new clients.

*Hugh Purvis,
Risk Management Advisor, RCM&D*

carriers will often send an expert to the home to document its features and estimate the replacement cost. The visit also gives the expert a chance to suggest ideas for better protecting the family and the home.

By contrast, mass-market policies typically offer basic replacement cost or extended replacement cost coverage. The former will pay to rebuild a damaged home up to the coverage limit in the policy. The latter will usually extend the amount it will pay up to 20-25 percent above the coverage. As the real-life disaster stories illustrate, even the extended replacement cost coverage might not make up for the shortfall.

OTHER COVERAGE OPTIMIZATION OPPORTUNITIES

Roughly three of four agents said that the amounts of coverage for personal property (the contents of the home) and other structures were likely to be set improperly, but they had about an equal chance of being too much or too little.

Other Structures

41 Percent Said Likely Overinsured / 37 Percent Underinsured

In addition to the primary dwelling structure on the property, homeowners policies list a coverage amount for other structures such as detached garages, swimming pools, driveways, and fences. Frequently, the amount of coverage for other structures is automatically set at 10 to 20 percent of the coverage amount for the primary dwelling.

Standard percentages usually work well for standard homes and properties. For high value homes or condominiums, however, the standard approach can be too restrictive. A home insured for \$2 million would have \$200,000 to \$400,000 in coverage for other structures. If only a fence and a driveway exist on the property in addition to the home, the coverage may be excessive. A New York City brownstone with no other structures provides an extreme example. By dropping the coverage for other structures to zero in a policy for a \$3.5 million brownstone, the owner could save about 4 to 5 percent in annual premium.

On the other hand, underinsurance could occur when a home insured for \$1 million has a swimming pool, a tennis court, and a detached garage with a second-story guest room. The cost of rebuilding those other structures could far exceed \$200,000, or 20 percent of the dwelling value.

Faced with such uncertainty, HNW-market carriers will often send a professional appraiser to examine the property and determine the coverage required for other structures, instead of assuming the standard percentage range of the home coverage amount will suffice. The policy itself should also have the flexibility to drop the percentage to zero if no other structures exist or go as high as the homeowner needs.

“One of our clients purchased a brownstone and the carrier included coverage for other structures, though there were none. We placed coverage with a carrier that offered greater customization and removed the protection he did not need for a considerable cost reduction. While we help clients protect their assets, we also help them remove coverage that is not needed.”

*Diane Borden, Vice President
Woodruff Sayer & Company*

Personal Property

37 Percent Said Likely Overinsured / 34 Percent Underinsured

Few people take the time to list everything in their home — the furniture, rugs, artwork, appliances, kitchenware, electronics, clothes, lawnmowers, and so forth — and then estimate how much it would cost to replace. Fewer still keep the list and values up to date. Consequently, they often rely on a rough guess or a standard percentage of the home's structural value, usually 50 to 70 percent, when deciding how much coverage they need.

But the amount of personal property relative to the home value can vary greatly. Perhaps a couple has just traded up to a multi-million-dollar home and does not yet have the resources to furnish it in anything more than a Spartan manner. Or, perhaps the home is a skiing getaway with only the bare necessities. The standard amount of coverage could easily be excessive. Reducing it could achieve significant impact on premium. For instance, lowering coverage for personal property from 70 to 40 percent could cut total premium for the home by 9 percent.

The reverse could apply for empty-nesters who have downsized to a luxury condominium or townhouse in an exclusive community. They may have accumulated fine furniture and other possessions that far exceed in value the standard percentage of coverage in relation to the residential structure. Indeed, an Chubb study of 400 homes found that underinsurance for contents occurs frequently for homes with structural values between \$2 million and \$7 million.⁹ Half the homes had insufficient coverage, and the average shortfall was \$600,000.

Unfortunately, if families want to be sure about the right amount of coverage for their personal property, few alternatives exist to the time-consuming task of keeping an up-to-date inventory. As one solution, Chubb recently launched a unique and complimentary home contents valuation service that gives select clients customized estimates of their personal property at policy inception. The estimate helps the client and agent make a more informed decision about the coverage needed.

For owners of high value homes, the potential benefits of getting the coverage right could justify hiring a specialist company to handle the inventory process for them. Companies such as Trōv are developing convenient and powerful methods for families to capture and manage information about their personal property online.

One last and powerful tip: personal property such as antique furniture, precious rugs, and rare books may qualify as fine art. Surprisingly, moving these items from general contents to valuables coverage as fine art can both cost less and strengthen protection, since a valuables policy typically has no deductible and covers a broader array of risks.

“We often run across individuals who are underinsured or incorrectly insured with their current insurance carrier. Many insurance carriers in the mainstream market cannot provide the types of coverage that a high net worth individual needs. These individuals often own assets that could be covered more effectively and for less premium if the insured were with the proper carrier.”

*Shannon Jenlink, Operations Manager
Signature Select LLC - an IMA Company*

THE PERSONAL RISK REVIEW: The First Step Toward Superior Protection and Value

Correcting the flaws that cause HNW families with substantial assets to both overpay and underinsure requires a customized approach, because risks tend to grow in number and complexity along with wealth, making each family's situation unique. As a result, structuring a sound insurance program should begin with a thorough personal risk review. Best conducted by an independent insurance agent or broker with experience in working with HNW families, the personal risk review typically covers three topics:

- Physical and financial assets: What homes, cars, recreational vehicles and watercraft does the family own? In particular, the agent should probe for high-value collections. Reviewing financial assets is also important. Otherwise, the agent will be unable to determine net worth for the purpose of recommending liability coverage limits.
- Occupation, activities, and family status: Do family members work from home, volunteer on the boards of charitable organizations, manage a family trust, employ domestic staff, travel internationally, or plan to renovate or expand their home? Are there particular concerns for family safety? Is a child about to reach driving age?
- Tolerance for risk and safety habits: Is insurance seen primarily as protection against catastrophic loss, or is it also expected to cover relatively small losses? Are alarm systems and other protective measures in place to reduce the risk of both small and large losses? Based on the review, the agent or broker can build a plan to address risk on a strategic and comprehensive basis. Many families find they can strengthen protection against catastrophic losses while holding costs roughly the same, or even cutting premium payments, by taking advantage of easy savings opportunities.

“Far too many in our industry promote the dangerous myth that all insurance is the same. In fact, the protection provided by different policies can vary widely, though in ways that are hard for even savvy consumers to discern. By serving as personal risks advisors, we remind consumers to focus on the actual worth of their coverage and help them to structure programs that provide the level of protection they will want should they ever need to use it.”

Tim O'Brien, Vice President, Assurex Global Private Client Practice Group

“Meeting with a prospective client through a recommendation provided by a trusted professional advisor provides me the opportunity to deliver real value. Most I meet with have observed no one has ever asked the important questions I have posed, and are astonished to learn of the many new solutions available to help tailor a program that meets their protection needs. It is hard to be a valuable resource without a proper introduction.”

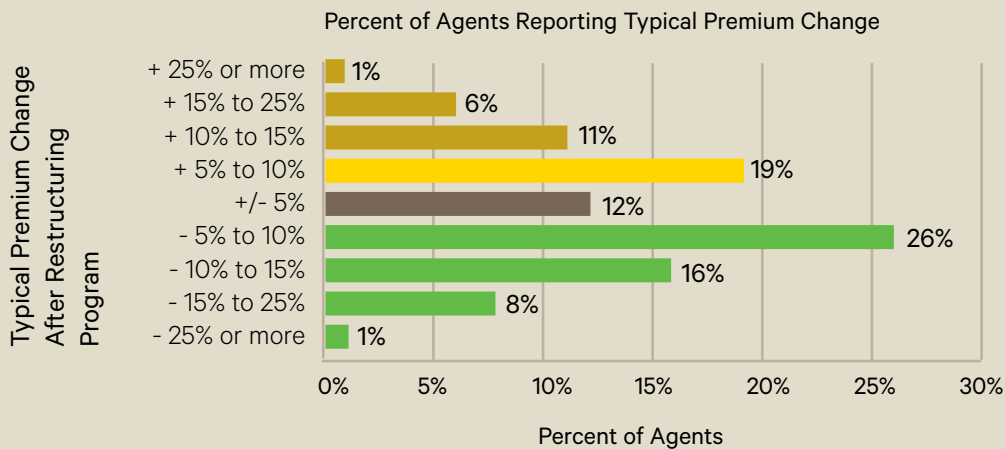

Liz Van Dervort, Producer, Gillis, Ellis & Baker

Cost Versus Value

Indeed, 51 percent of the agents reported that the cost of a newly structured program with a HNW-market carrier was usually 5 percent less than the cost of the previous program with a mass-market carrier. Another 12 percent said the cost came within plus or minus 5 percent of the previous program.

The remaining 37 percent of agents reported that premiums typically increased 5 percent or more when they restructured a new client's program and moved coverage from a mass-market to HNW-market carrier. Despite the increase, agents said clients often appreciated the move once they considered value instead of price alone.

Maximum value cannot be achieved, however, unless the insurance company chosen has the capacity and flexibility to allow a tailored approach. Capabilities to seek include:

- Full replacement cost for the home structure and other structures
- Ability to properly estimate the cost of replacing a unique high value home
- Flexibility to set other structures coverage from zero to as much as needed
- Flexibility to set personal property coverage well above or below the standard industry percentages of the home's structural value
- Protection for market value increases in valuables coverage
- Ability to cover groups of valuables on a blanket basis
- Umbrella liability limits available from \$1 million up to \$100 million
- Ability to add uninsured/underinsured coverage that goes beyond vehicular accidents
- Ability to add employment practices liability and not-for-profit D&O liability coverage
- Ability to combine a variety of policies into one package earning a package discount
- High deductible options for home and auto coverage that significantly reduce premium
- A robust selection of loss prevention services to reduce the risk of minor and major losses

Only a handful of companies offer such policies. As one of the few, Chubb Personal Risk Services offers the Chubb Platinum Portfolio program, which can bundle homeowners, auto, valuable collections, watercraft and umbrella liability coverage into one package policy that offers the savings of a package discount and the convenience of one bill.

CASE STUDIES

To illustrate the benefits of rebalancing an insurance program to strengthen wealth protection and better manage expenses, the following case studies present a before-and-after comparison* for three typical families with substantial assets.

1. Kelly and Steve: Escaping the City

Living in the Seattle area, Kelly and Steve are successful software engineers in their late-thirties with two children in elementary school. They have recently left their city condo for a comfortable home in Sammamish, WA. They drive a BMW X5 and an Infinity G37 Coupe, and employ a full-time nanny to take care of the kids and help with household chores. They also own a condo in Maui, HI. Their insurance plan, which costs \$10,944*, exhibits many of the typical patterns of overpaying and underinsuring. Kelly and Steve could significantly improve their financial security while reducing their total premium by almost \$900 or 8 percent by rebalancing their program as follows:

Savings Opportunities

- Raise deductibles on the homeowners policy from \$500 to \$2,500 and on the auto policy from \$500 to \$1,000.
- Earn a 10 percent package credit by placing their homeowners, valuables, auto, and umbrella policies with the same carrier.
- Reduce personal property from 70 to 50 percent, since they have not had the time or financial resources to furnish their new home lavishly or accumulate many valuable items.
- Take advantage of loss prevention credits for water and gas leak detection systems, an automatic standby generator, and gated community credits in their homeowners coverage.

Coverage Improvements

- Acquire full replacement cost coverage for their home and condo, which requires increasing the insured value of their home from \$1 million to \$1.5 million and the additions and alterations coverage for their condo from \$200,000 to \$250,000.
- Raise the umbrella liability limit from \$2 million to \$5 million to protect their net worth and future income stream.
- Add uninsured/underinsured liability coverage and, because of the nanny, employment practices liability coverage, which protects against lawsuits claiming discrimination, sexual harassment, wrongful termination, and other employment practice violations.
- Move \$25,000 in coverage for china, fine art and miscellaneous jewelry from personal property to blanket valuables coverage, which is also less expensive.

***For the purpose of before-and-after comparisons in the case studies, all premium estimates are based on coverage rates for the Chubb Platinum Portfolio program in 2012. Rates are subject to change and may vary by location and other factors.**

The table below shows a before-and-after comparison of policy characteristics that address the imbalances.

Young HNW Couple—Insurance Program Comparison

Home in Sammamish, WA	Before	After
Home structure limit	\$1.0 million	\$1.5 million
Other structures limit*	20% (\$200,000)	20% (\$300,000)
Personal property limit	70% (\$700,000)	50% (\$750,000)
Basic deductible / Hurricane deductible	\$500 / 1%	\$2,500 / 5%
Water leak detection credit	No	Yes
Automatic standby generator credit	No	Yes
Package credit	No	Yes
Condo in Maui, HI		
Additions and alterations limit	\$200,000	\$250,000
Personal property limit	70% (\$140,000)	40% (\$100,000)
Deductible	\$500	\$2,500
Water leak detection credit	No	Yes
Gas leak detection credit	No	Yes
Gated community credit	No	Yes
Package credit	No	Yes
Homeowners premium	\$5,609	\$5,092
Valuables		
Jewelry limit (scheduled)	\$30,000	Same
Jewelry limit (blanket)	\$0	\$10,000
China (blanket) limit	\$0	\$5,000
Fine Art (blanket) limit	\$0	\$10,000
Package credit	No	Yes
Valuables premium	\$427	\$592
Auto*		
2009 BMW X5 deductible	\$500	\$1,000
2009 Infinity G37 Coupe deductible	\$500	\$1,000
Package credit	No	Yes
Auto Premium	\$4,500	\$3,130
Excess Liability		
Umbrella liability limit	\$2 million	\$5 million
Uninsured/underinsured liability limit	\$0	\$1 million
Employment practices liability (1 staff)	No	Yes
Package credit	No	Yes
Excess liability premium	\$408	\$1,246
Total Premium	\$10,944	\$10,060

Kelly and Steve could significantly improve their financial security while reducing their total premium by almost \$900 or 8 percent by rebalancing their program as follows:

*For the sake of brevity, only those aspects of coverage that changed are listed.

2. Ellen and Alex: Riding High

Ellen and Alex are a couple in their early fifties with two children in high school and another away at college. They live in a historic, professionally decorated home with a tennis court and detached garage in Lake Forest, IL. They also have a ranch home outside of Park City, UT, with a stable and horses. They own a Jaguar XF, Mercedes S550, Cadillac Escalade, and, at the ranch, a Jeep Grand Cherokee. They employ a full-time caretaker to tend the horses and grounds of the ranch. Paying \$22,756 annually for an insurance program with the usual problems of overpaying and underinsuring, Ellen and Alex could better secure their long-term financial well-being while saving more than \$6,000 or 27 percent of their premium by rebalancing their programs as follows:

Savings Opportunities

- Raise deductibles on home policies from \$500 to \$5,000 and on autos from \$500 to \$2,500.
- Earn a 10 percent package credit by placing their homeowners, valuables, auto, and umbrella policies with the same carrier.
- Reduce personal property for the ranch home from 70 to 30 percent, since the ranch is not the primary residence and is sparsely furnished.
- Take advantage of loss prevention credits for water leak detection systems, an electrical system that was rehabilitated in 2011, and a temperature monitoring system.
- Store several high value, rarely worn pieces of jewelry in a bank safe deposit box.

Coverage Improvements

- Raise the insured value of the historic Lake Forest home from \$3.0 million to \$3.7 million. Slightly increase coverage for other structures and personal property, too.
- Raise the insured value of the stable at the ranch home by \$120,000 to reflect its true replacement cost.
- Raise the amount of jewelry and fine art coverage by \$175,000 to reflect market value appreciation. Secure valuables coverage for a wine collection (\$20,000) and a piano (\$30,000).
- Increase umbrella liability protection from \$5 million to \$10 million and uninsured/underinsured coverage from \$1 million to \$3 million.
- Add employment practices liability coverage because of the caretaker.

The table below shows a before-and-after comparison of policy characteristics that address the imbalances.

Established HNW Family—Insurance Program Comparison

Home in Lake Forest, IL	Before	After
Home structure limit	\$3.0 million	\$3.7 million
Other structures limit	30% (\$900,000)	25% (\$925,000)
Personal property limit	70% (\$2.1 million)	60% (\$2.4 million)
Deductible	\$500	\$5,000
Water leak detection credit	No	Yes
Rehabilitated electrical system credit	No	Yes
Package credit	No	Yes
Ranch Home near Park City, UT		
Home structure limit	\$1.2 million	\$1.2 million
Other structures limit	20% (\$240,000)	30% (\$360,000)
Personal property limit	70% (\$840,000)	30% (\$360,000)
Deductible	\$500	\$5,000
Water leak detection credit	No	Yes
Temperature monitoring system credit	No	Yes
Package credit	No	Yes
Total homeowners premium	\$15,717	\$9,059
Valuables		
Jewelry (stored at home)	\$75,000	\$50,000
Jewelry (stored in bank vault)	\$0	\$100,000
Musical instruments	\$0	\$30,000
Silverware	\$5,000	Same
Wine	\$0	\$20,000
Fine art (scheduled)	\$200,000	\$250,000
Fine art (blanket)	\$0	\$50,000
Package credit	No	Yes
Total valuables premium	\$1,609	\$1,865
Auto*		
2011 Jaguar XF deductible	\$500	\$2,500
2009 Mercedes S550 deductible	\$500	\$2,500
2007 Cadillac Escalade deductible	\$500	\$2,500
2006 Jeep Grand Cherokee deductible	\$500	\$2,500
Package credit	No	Yes
Total auto premium	\$4,390	\$2,899
Excess Liability		
Umbrella liability limit	\$5 million	\$10 million
Uninsured/underinsured liability limit	\$1 million	\$3 million
Employment practices liability (1 staff)	No	Yes
Package credit	No	Yes
Total excess liability premium	\$1,040	\$2,715
Total Premium	\$22,756	\$16,538

*For the sake of brevity, only those aspects of coverage that changed are listed.

Ellen and Alex could better secure their long-term financial well-being while saving more than \$6,000 or 27 percent of their premium by rebalancing their program.

3. Terri and Bill: An Appreciation of Art

Terri and Bill are a couple in their early-sixties whose children have started promising professional careers and live independently. Thus, they have recently downsized from a suburban home outside of Boston to a luxury condo in Beacon Hill. They also own homes in Chatham on Cape Cod, MA, and in Stowe, VT. Avid art collectors, they have a significant collection of paintings. They also collect antique furniture, and Terri has a large jewelry collection. They drive an Audi A8 and Porsche Cayenne. Terri volunteers on the board of a local non-profit museum, and they employ one full-time housekeeper. Overall, Terri and Bill pay \$41,788 in annual premium for their homeowner, auto, valuables, and umbrella liability coverage, but like HNW couples, they are missing opportunities to tailor coverage to their specific needs to maximize the value of their program. By making the following adjustments, they can save more than \$14,000 or 34 percent while also strengthening protection against catastrophic loss.

Savings Opportunities

- Raise deductibles in their homeowners policy from \$2,500 to \$10,000 and in their auto policy from \$1,000 to \$5,000.
- Earn a 10 percent package credit by placing their homeowners, valuables, auto, and umbrella policies with the same carrier.
- Reduce the other structures coverage from 20 to 10 percent for the ski home in Stowe, since it has only a short driveway and walkway.
- Reduce the personal property coverage percentage at the Stowe home from 70 to 40 percent because it is sparsely furnished.
- Take advantage of loss prevention credits for being in a gated community and having water and gas leak detection and temperature monitoring systems.
- Store half the jewelry collection in a bank safe deposit box.

Coverage Improvements

- Increase the insured value of the Chatham home by \$500,000, its other structures (including a swimming pool) by \$100,000, and personal property by \$250,000 to reflect their true replacement cost.
- Increase coverage by \$265,000 for the fine art and antique furniture to account for current market values.
- Increase the umbrella liability coverage limit from \$5 million to \$10 million and the uninsured/underinsured liability coverage from \$2 million to \$3 million to protect the couple's high net worth.
- Add not-for-profit directors & officers liability coverage, considering Terri's volunteer board position.
- Add employment practices liability coverage due to the full-time housekeeper.

The table below shows a before-and-after comparison of policy characteristics that address the imbalances.

Empty-Nester Affluent Couple—Insurance Program Comparison

Condo in Beacon Hill, Boston, MA	Before	After
Condo additions & alterations limit	\$1.0 million	Same
Personal property limit	50% (\$500,000)	80% (\$800,000)
Gated community credit	No	Yes
Home in Chatham (Cape Cod), MA		
Home structure limit	\$2.5 million	\$3.0 million
Other structures limit	20% (\$500,000)	20% (\$600,000)
Personal property limit	50% (\$1.25 million)	50% (\$1.5 million)
Water leak detection credit	No	Yes
Gas leak detection credit	No	Yes
Temperature monitoring system credit	No	Yes
Gated community credit	No	Yes
Home in Stowe, VT		
Home structure limit	\$1.5 million	Same
Other structures limit	20% (\$300,000)	10% (\$150,000)
Personal property limit	70% (\$1.05 million)	40% (\$600,000)
Water leak detection credit	No	Yes
Temperature monitoring system credit	No	Yes
Deductible – all locations	\$2,500	\$10,000
Package credit - all locations	No	Yes
Total homeowners premium	\$30,166	\$18,669
Valuables		
Jewelry (at home / in bank vault)	\$200,000 / \$0	\$100,000 / \$100,000
Fine art	\$500,000	\$750,000
Antique furniture	\$15,000	\$30,000
Silverware	\$5,000	Same
China	\$5,000	Same
Package credit	No	Yes
Total valuables premium	\$3,664	\$2,613
Auto*		
2009 Audi A8 deductible	\$1,000	\$5,000
2001 Porsche Cayenne deductible	\$1,000	\$5,000
Package credit	No	Yes
Total auto premium	\$4,361	\$3,256
Excess Liability		
Umbrella liability limit	\$5 million	\$10 million
Uninsured/underinsured liability limit	\$2 million	\$3 million
Not-for-profit D&O liability limit	No	\$1 million
Employment practices liability (1 staff)	No	Yes
Package credit	No	Yes
Total excess liability premium	\$973	\$2,554
Total Premium	\$41,788	\$27,735

By making adjustments, Terri and Bill could save more than \$14,000 or 34 percent while also strengthening protection against catastrophic loss.

*For the sake of brevity, only those aspects of coverage that changed are listed.

CONCLUSION

HNW families who insure with mass-market carriers are even more likely than they were a few years ago to be overpaying for insurance that leaves them vulnerable to significant financial loss. To better protect their assets and lifestyle, these families and their wealth advisors should work with an independent insurance agent or broker who understands the unique needs of HNW clients and has access to one or more HNW-market carriers. By conducting a thorough personal risk review, the agent or broker can create a customized insurance program that offers more effective protection, often with no significant increase in premium.

About Chubb Personal Risk Services

Chubb Personal Risk Services is the Chubb Group's high net worth personal insurance business, which provides specialty coverage for homeowners, automobile, recreational marine, umbrella liability and valuable collections insurance for individuals and families with emerging and established wealth. Policies issued by Bankers Standard Insurance Co. and Chubb Insurance Co. of the Midwest. Additional information can be found at: www.chubbprs.com.

The Chubb Group is a global leader in insurance and reinsurance serving a diverse group of clients. Headed by Chubb Limited (NYSE: Chubb), the Chubb Group conducts its business on a worldwide basis with operating subsidiaries in more than 50 countries. Additional information can be found at: www.chubbgroup.com.

Exhibit I

TEN QUESTIONS HELP

REVEAL IF YOU ARE OVERPAYING TO BE UNDERINSURED

These questions can in most cases identify the key areas where families with substantial assets are likely underinsured or missing savings opportunities, based on our survey of independent insurance advisors. **If you answer “no” to any of the questions listed below, you are likely at risk.** You should strongly consider a consultation with an independent insurance agent or broker experienced in dealing with financially successful families.

Are you underinsured?

1. Do you have umbrella liability coverage, and have you chosen a coverage amount that matches your net worth and future employment income stream?
2. Will your homeowners policy pay to rebuild your home with similar quality materials and craftsmanship no matter how much it costs?
3. If you recently expanded or upgraded your home, did you discuss it with your insurance agent?
4. If you own a significant amount of artwork, oriental rugs, antiques, and other collectibles, have you insured them with a valuables policy and made sure to account for any change in their value from year to year?
5. Do you have at least \$1 million in uninsured/underinsured liability protection, and does it apply to more than vehicular accidents?
6. If you employ household staff such as a nanny, caretaker, or chef, do you have employment practices liability insurance?
7. If you serve as an unpaid board member of a not-for-profit organization, do you realize the organization’s insurance program may not fully protect you from liability lawsuits brought against it?

Are you overpaying?

8. Have you recently evaluated the potential for reducing the cost of your insurance program by raising your homeowners and auto policy deductibles?
9. Have you consolidated your homeowners, valuable collections, auto, watercraft, and umbrella liability policies with a carrier that offers a package discount?
10. Have you and your agent discussed all the safety and loss prevention devices in your homes and autos? For an interactive version of this tool providing explanations linked to each question, [click here](#).

Exhibit II

SURVEY METHODOLOGY AND ADDITIONAL RESULTS

Chubb Personal Risk Services' conducted its survey in June 2012 and March 2010 among independent insurance agents and brokers who serve the personal insurance needs of high net worth clients. The online survey was sent to more than 3,000 individuals in 2012 and more than 2,000 individuals in 2010. It was completed by approximately 670 respondents in 2012 and 600 respondents in 2010.

The survey asked respondents to consider all the new high net worth clients (defined as paying \$5,000 or more in annual premium) that previously had a mainstream carrier when they first came into contact with them. They were then asked to assess how well the clients' previous insurance program matched their needs based on an analysis of their risk profiles. The margin of error is + / - 3.4%.

Following are additional results that were not previously displayed in this white paper:

Percent of Agents Reporting Insurance Coverage as Likely Overinsured			
Coverage Type	2012	2010	Ppt. Chg.
Umbrella liability	0%	1%	- 1
Valuables	1%	1%	+ 0
Uninsured/underinsured liability	0%	1%	- 1
Home structure (Coverage A dwelling limit)	4%	5%	- 1
Flood	0%	1%	- 1
Mold	0%	1%	- 1
Employment practices liability for domestic staff	0%	0%	0
Auto liability	0%	0%	0

Important Notice: This white paper contains only a general description of the insurance coverages provided by the Chubb Platinum Portfolio. Coverage terms are subject to change and can vary by state.

The white paper does not include all of the benefits and limitations found in the policy. The insurance policy itself, not this white paper, will form the contract between the policyholder and the insurance company. The safety information is advisory in nature. No liability is assumed by reason of the information in this document. Policies issued by Bankers Standard Insurance Co., Chubb Insurance Company of the Midwest, and Atlantic Employers Insurance Co.
